TOKUL™ XC 8.0

WEIGHT: 1 lb. 3 oz. | 539g

CAPACITY:

GEAR	+	HYDRATION	=	TOTAL
5L		3L		8L

PLATYPUS® PACKS ARE BUILT AROUND THE WORLD'S BEST HYDRATION SYSTEM

Platy Big Zip™ LP reservoirs are made in the USA from a proprietary laminate that combines a rugged exterior with a food-grade, taste-free interior. Each comes with a perfect combination of features to make hydration easy.

1. Super-tough exterior with taste-free lining
2. SlideLock™ closure for total security
3. Big Zip™ opening makes it easy to fill, clean and dry
4. Low-profile design rides flat in your pack
5. Silver-ion antimicrobial treatment keeps it fresh
6. Leak-free 90° shutoff valve
7. High-flow HyperFlow™ bite valve
8. Food-grade materials are free of BPA and phthalates
9. Quick Disconnect drink tube lets you leave hose routed in pack for easy filling

DRINK TUBE ROUTING

- Start by disconnecting the hose from the reservoir.
- Attach the magnet hose clip found near the shutoff valve to the magnet retainer found on the sternum strap.
- Thread the Quick Disconnect end of the tube through the two elastic webbing loops on the shoulder strap and the pack's hydration port.
- You can route the hose on either shoulder strap, and mount the bite valve across the chest if desired.
- Store spare hose inside the pack, or cut it to length by cutting material from the Quick Disconnect end and reinserting the fitting.
- Your magnetic hose retainer provides easy access to hydration – when set up correctly it should almost attach itself.
- Separate the reservoir from the hose at the Quick Disconnect for easy refilling and cleaning.

RESERVOIR SUSPENSION

- Our simple hook attachments hold your reservoir in place
- Ensures maximum flow rate
- Stabilizes shoulder straps for a secure fit
- Fast to install

PACK FEATURES

1. 3D AIR MESH SHOULDER STRAPS

- Maximum ventilation and rapid drying
- Seamless binding on shoulder straps near neck eliminates chafing
- Unique construction allows straps to stretch and move with you

2. STERNUM STRAPS

- Fixed side allows one-handed buckling
- Tracked, vertical adjustment assures a perfect fit

3. STASHABLE WAISTBELTS

- Keeps your pack in place on steep descents and rough terrain
- Stashes cleanly when not needed to prevent snagging

4. STRAP RETAINERS

- Strap retainers keep excess webbing out of the way while you're riding
- Position the retainer, then pinch the webbing and insert one side at a time

5. LOW-PROFILE TAIL LIGHT SLOT

- Low position assures maximum visibility
- Keeper-webbing inside for added security

GEAR STORAGE

TOOLS

- Dedicated pump and tool storage areas
- Fold back lids create a clean workspace, anywhere

LOW-PROFILE HELMET/ ACCESSORY ATTACHMENT

- On-seam cords secure standard helmets via chin straps.
- Add your own straps to boost storage space for extra layers and other light items.

STRETCH MESH POCKET (TOKUL XC 8)

- External storage offers quick access on the go.

PLATYPUS® CARE AND FEEDING

To get the best performance from your Platypus products, follow these basic guidelines:

HYDRATION PACKS

Keeping your pack clean will help extend the life of your pack. Brush superficial dirt away, or rinse with warm water. If necessary, you can hand wash your pack with a sponge and mild soap. Rinse thoroughly to remove soap residue. **DO NOT MACHINE WASH OR DRY YOUR PACK.** Always empty and dry your pack before storage.

RESERVOIR CARE

Always store your reservoir dry or in your freezer. Our reservoirs are easy to dry on plastic bag drying racks, readily available at most kitchen supply retailers, and you can easily use a dishtowel with our wide, Big Zip™ openings.

For more great tips and videos on the care and storage of your Platypus products, please visit us online at www.platy.com/FAQ
