

## PLATYPUS® CARE AND FEEDING

To get the best performance from your Platypus products, follow these basic guidelines:

### HYDRATION PACKS

Keeping your pack clean will help extend the life of your pack. Brush superficial dirt away, or rinse with warm water. If necessary, you can hand wash your pack with a sponge and mild soap. Rinse thoroughly to remove soap residue. **DO NOT MACHINE WASH OR DRY YOUR PACK.** Always empty and dry your pack before storage.

### RESERVOIR CARE

Always store your reservoir dry or in your freezer. Our reservoirs are easy to dry on plastic bag drying racks, readily available at most kitchen supply retailers, and you can easily use a dishtowel with our wide, Big Zip™ openings.

#### CAPACITY:

GEAR	+	HYDRATION	=	TOTAL
22L		3L		25L

### SPRINTER™ XT 35.0

**WEIGHT:** 2 lbs. 10 oz. | 1191 g (S/M)  
2 lbs. 13 oz. | 1276 g (M/L)

#### CAPACITY:

GEAR	+	HYDRATION	=	TOTAL
32L		3L		35L

## PLATYPUS® PACKS ARE BUILT AROUND THE WORLD'S BEST HYDRATION SYSTEM

Platy Big Zip™ LP reservoirs are made in the USA from a proprietary laminate that combines a rugged exterior with a food-grade, taste-free interior. Each comes with a perfect combination of features to make hydration easy.

1. Super-tough exterior with taste-free lining
2. SlideLock™ closure for total security
3. Big Zip™ opening makes it easy to fill, clean and dry
4. Low-profile design rides flat in your pack
5. Silver-ion antimicrobial treatment keeps it fresh
6. Leak-free 90° shutoff valve
7. High-flow HyperFlow™ bite valve
8. Food-grade materials are free of BPA and phthalates
9. Quick Disconnect drink tube lets you leave hose routed in pack for easy filling

### DRINK TUBE ROUTING

- Start by disconnecting the hose from the reservoir.
- Attach the magnet hose clip found near the shutoff valve to the magnet retainer found on the sternum strap.
- Thread the Quick Disconnect end of the tube through the two elastic webbing loops on the shoulder strap and the pack's hydration port.
- You can route the hose on either shoulder strap, and mount the bite valve across the chest if desired.
- Store spare hose inside the pack, or cut it to length by cutting material from the Quick Disconnect end and reinserting the fitting.
- Your magnetic hose retainer provides easy access to hydration – when set up correctly it should almost attach itself.
- Separate the reservoir from the hose at the Quick Disconnect for easy refilling and cleaning.

### RESERVOIR SUSPENSION

- Our simple hook attachments hold your reservoir in place
- Ensures maximum flow rate
- Stabilizes shoulder straps for a secure fit
- Fast to install

## PACK FEATURES

### 1. 3D AIR MESH SHOULDER STRAPS

- Maximum ventilation and rapid drying
- Seamless binding on shoulder straps near neck eliminates chafing
- Unique construction allows straps to stretch and move with you

### 2. STERNUM STRAPS

- Fixed side allows one-handed buckling
- Tracked, vertical adjustment assures a perfect fit

### 3. STRAP RETAINERS

- Strap retainers keep excess webbing out of the way while you're riding
- Position the retainer, then pinch the webbing and insert one side at a time

### 4. MULTI-USE WAISTBELTS

#### FULL SUPPORT

Wide mesh waistbelt supports full packs and heavier loads. Strap retainers hold extra webbing in place.

#### LIGHTWEIGHT SUPPORT

Stash the mesh and use just the webbing for lighter loads and basic stability.

Bring split buckle (a) back and attach to webbing loop (b).

Push folded waistbelt behind back panel to stash.

#### FULLY STOWED

Stash everything. Ideal for around town, airports and anywhere a waistbelt would be in your way.

## GEAR STORAGE/ORGANIZATION

### LOW-PROFILE HELMET /ACCESSORY ATTACHMENT

- On-seam cords secure standard helmets via chin straps.

### TREKKING POLES/ICE AXES

- For Trekking poles, make a one-time adjustment of lower cords by releasing cordlock from inside external pocket and adjust cords to accommodate pole tips.
- To anchor poles and axes at the top of pack, simply wrap shafts with elastic cord and hook together as shown above.

### STASHABLE SIDE COMPRESSION AND LOW PROFILE HELMET/ACCESSORY ATTACHMENT

- All external compression/accessory straps can be cinched or stashed inside hidden, on-seam pockets to prevent snagging.
- On-seam cords secure helmets via chin straps.
