## MSR Shelters for 2011

### Essential Series

Ultralight tarp, wing and single-wall shelters that meet the demands of minimalist backcountry travelers.

#### Fast Stash™

This versatile, ultralight shelter offers full protection and ample room in a single-wall body that pitches quickly with included poles, or trekking poles for added weight efficiency. A front porch and adjustable side wings add external coverage and allow maximum ventilation in a broad spectrum of weather conditions. To stash gear for a day hike, poles can be pulled out to collapse shelter but re-pitched easily upon return.

<b>Fast Stash</b>	1 door
Capacity:	2+ gear
Minimum Weight:	1,3 kg *
	*Weight without included poles (body only)
Floor Area:	3,4 sq. m
Interior Peak Height:	117 cm
Livable Volume:	2322 L
Release Date:	January 2011

#### E-Wing™

Now with more coverage and protection, the E-Wing shelter defines the minimalist experience, easily accommodating two people at just 450g. Waterproof, with new DuraShield™ coating and versatile with multiple pitch options.

<b>E-Wing</b>	1+ gear
Capacity:	0,45 kg
Minimum Weight:	6 sq. m
Floor Area:	Variable
Interior Peak Height:	Variable
Release Date:	January 2011

## Twing™

Perfect for minimalists, this shaped tarp offers increased protection from wind and rain with great ventilation. Weighing less than 850g, this superlight tarp offers an impressive 6,3m<sup>2</sup> of space, plenty of room for two people plus gear, or use as a group shelter. Use any trekking poles, walking staffs, or even paddle shafts to set up, or tie off guy cords to an overhead object. One end is sealed off from the elements, while the other end is open for ventilation.

### Twing

Capacity: 2+ gear  
Minimum Weight: 0,85 kg  
Floor Area: 6,3 sq. m  
Interior Peak Height: Variable  
Release Date: Released January 2009

## Zing™

The lightweight choice for packable group protection, this redesigned group tarp offers 18,6m<sup>2</sup> of waterproof coverage at a weight that is still light enough to carry into the backcountry.

### Zing

Capacity: 6-12  
Minimum Weight: 2,94 kg  
Floor Area: 18,6 sq. m  
Interior Peak Height: Variable  
Release Date: January 2011

## Twin Sisters™

Now with two doors, the Twin Sisters shelter is the perfect ultralight, all-weather shelter for two people. This minimalist shelter pitches quickly and easily with included poles or trekking poles. A steep roof, snow flaps and new DuraShield coatings help seal out wind, rain and snow. An optional, removable floor is sold separately.

### Twin Sisters

Capacity: 2+ gear  
Minimum Weight: 0,94 kg  
Floor Area: 4,1 sq. m  
Interior Peak Height: 122 cm  
Livable Volume: 2888 L  
Release Date: January 2011

## Twin Brothers™

Big brother to the Twin Sisters, this livable shelter provides all-weather protection for up to six people and pitches easily with included poles. Features include: 173cm of peak height with vents, a large door, snow flaps and proprietary DuraShield™ coatings that seal out the elements. An optional, removable floor is sold separately.

### Twin Brothers

Capacity:	4-6
Minimum Weight:	2.2 kg
Floor Area:	8,9 sq. m
Interior Peak Height:	173 cm
Livable Volume:	6824 L
Release Date:	January 2011

## E-Bivy™

The lightest and most compact weather-resistant MSR bivy, now with increased breathability to minimize condensation. A SilNylon top and DuraShield™-coated bottom protect the E-Bivy from dew and frost while providing warmth. Packs ultra-small.

### E-Bivy

Capacity:	1
Minimum Weight:	0,25 kg
Release Date:	January 2011

## AC-Bivy™

One of the lightest bivies on the market offering all-condition protection, the AC-Bivy features waterproof/breathable top with a DuraShield™-coated floor and a zippered mesh closure that allows great ventilation while maintaining bug protection.

### AC-Bivy

Capacity:	1
Minimum Weight:	0,45 kg
Release Date:	January 2011

## Experience Series

Built with versatility to comfortably handle anything from the light snows of early fall, to ultralight summer nights.

### Hoop™

Providing lightweight packability with ample space for two, the Hoop tent features two extra-large doors, two spacious vestibules, a gear loft and generous floor plan to accommodate larger mattresses and extra gear. Unique pole geometry adds strength for shoulder-season adventures and optional poles can be removed for saving weight on lightweight trips.

<b>Hoop</b>	2 doors, 2 vestibules
Capacity:	2
Minimum Weight:	2,05 kg
Floor Area:	2,9 + 1,7 sq. m
Interior Peak Height:	112 cm
Livable Volume:	1783 + 708 L
Release Date:	January 2011

### Holler™

Packed with do-all-utility, the Holler tent is the roomiest 3-person backpacking tent in the MSR line. Featuring two extra-large doors at head and toe for uncompromised access, two spacious vestibules, a gear loft and generous floor plan to accommodate larger mattresses and extra gear. Unique pole geometry adds strength for shoulder-season adventures.

<b>Holler</b>	2 doors, 2 vestibules
Capacity:	2
Minimum Weight:	2,73 kg
Floor Area:	4,4 + 1,6 sq. m
Interior Peak Height:	114 cm
Livable Volume:	3229 + 382 L
Release Date:	January 2011

## Carbon Reflex™ 1

The lightest double wall MSR tent available, achieved by carbon fiber poles and an efficient pole design. Comparable to the best-selling MSR Hubba™ tent in volume but more than half a pound lighter, this non-freestanding solo tent offers maximum interior space, with a roomy front vestibule and zippered access to a rear vestibule. The tent is quick and easy to set up, and can be pitched with just the fly and footprint for a compact, fly-weight shelter to save even more weight.

<b>Carbon Reflex 1</b>	1 door, 1 vestibule
Capacity:	1
Minimum Weight:	0,97 kg
Floor + Vestibule Area:	1,6 + 0,9 sq. m
Interior Peak Height:	94 cm
Livable Volume:	595 + 240 L
Release Date:	January 2011

## Carbon Reflex™ 2

Providing full-featured room for two at the weight of many one-person tents, this is the lightest two-person double wall MSR tent available, due to carbon fiber poles and an efficient pole design. Comparable to the best-selling MSR Hubba Hubba™ tent in volume, but almost one pound lighter, the unique pole configuration provides maximum interior space, a roomy front vestibule and zippered access to a rear vestibule.

<b>Carbon Reflex 2</b>	1 door, 1,5 vestibules
Capacity:	2
Minimum Weight:	1,21 kg
Floor + Vestibule Area:	2,7 + 1,3 sq. m
Interior Peak Height:	100 cm
Livable Volume:	1217 + 382 L
Release Date:	January 2011

## Carbon Reflex™ 3

Providing full-featured room for three at a weight usually packed for two, the free-standing shelter features two doors, two vestibules and ample room for living and storage. With more volume than the MSR Mutha Hubba tent, the Carbon Reflex 3 tent shaves nearly a pound of pack weight at a minimum weight of just 2kg. The efficient design includes easy-setup carbon fiber poles, mesh walls for superior ventilation and versatile assembly options.

<b>Carbon Reflex 3</b>	2 doors, 2 vestibules
Capacity	3
Minimum Weight:	1,9 kg
Floor + Vestibule Area:	3,8 + 1,8 sq. m
Interior Peak Height:	117 cm
Livable Volume:	3530 + 556 L
Release Date:	January 2011

## Hubba™

A pioneer of the innovative hub design that changed tents forever, the Hubba tents continue to be some of the best options in all-around backpacking performance. The solo Hubba tent is freestanding, sets up easily and allows for minimalist set up with just fly and poles. Now with green rain fly and waterproof DuraShield™ coatings.

<b>Hubba</b>	1 door, 1 vestibule
Capacity:	1
Minimum Weight:	1,29 kg
Floor + Vestibule Area:	1,6 + 0,9 sq. m
Interior Peak Height:	100 cm
Livable Volume:	623 + 254 L
Release Date:	January 2011

## Hubba Hubba™

The best-selling, freestanding MSR Hubba Hubba tent features maximum interior space, Stay-Dry entrances, two large vestibules and waterproof DuraShield™ coatings. Sets up fast and easy with unique pole configuration and hub system. For minimalist trips, set up with just fly and poles. Now with new green rain fly.

<b>Hubba Hubba</b>	2 door, 2 vestibules
Capacity:	2
Minimum Weight:	1,83 kg
Floor + Vestibule Area:	2,7 + 1,62 sq. m
Interior Peak Height:	100 cm
Livable Volume:	1217 + 538 L
Release Date:	January 2011

## Mutha Hubba™

The popular Mutha Hubba tent offers all of the features of the Hubba Hubba tent with 3-person livability. Two full vestibules and two doors at head and toe provide easy access. Now with new green rain fly and waterproof DuraShield™ coatings.

<b>Mutha Hubba</b>	2 doors, 2 vestibules
Capacity:	3
Minimum Weight:	2,88 kg
Floor + Vestibule Area:	3,7 + 1,3 sq. m
Interior Peak Height:	117 cm
Livable Volume:	2945 + 623 L
Release Date:	January 2011

## Hubba HP™ Series

The streamlined HP (High Performance) versions of the popular MSR Hubba series tents provide added protection from snow, sand and wind, while a unique pole configuration provides maximum interior and storage space. Available in the MSR Experience™ Series, the ultralight, freestanding Hubba HP series tents are now only available in Europe.

**Hubba HP** 1 door, 1 vestibule  
Capacity: 1  
Minimum Weight: 1,16 kg  
Floor + Vestibule Area: 1,6 + 0,9 sq. m  
Interior Peak Height: 100 cm  
Livable Volume: 623 + 254 L

**Hubba Hubba HP** 2 doors, 2 vestibules  
Capacity: 2  
Minimum Weight: 1,69 kg  
Floor + Vestibule Area: 2,7 + 1,6 sq. m  
Interior Peak Height: 100 cm  
Livable Volume: 1217 + 538 L

**Mutha Hubba HP** 2 doors, 2 vestibules  
Capacity: 3  
Minimum Weight: 2,86 kg  
Floor + Vestibule Area: 3,7 + 1,3 sq. m  
Interior Peak Height: 117 cm  
Livable Volume: 2945 + 623 L

Released: January 2010

## Gear Shed™

**NEW** This versatile new accessory adds increased livability to any existing Hubba, Hubba HP, Hubba Hubba or Hubba Hubba HP tent, transforming a lightweight backpacking tent into a park and play or basecamp tent. The add-on hoop-style vestibule adds 2,5 sq. m of space and features a partial floor to provide a clean place to store gear.

**Gear Shed** Add-on vestibule  
Capacity: Gear  
Minimum Weight: 0,78 kg  
Floor Area: 2,5 sq. m  
Interior Peak Height: 89 cm  
Livable Volume: 651 L  
Release Date: January 2011

## Backcountry Barn™

Sleeps 4-5 people plus gear and packs down to the size of many 3-person tents. The straightforward design allows for easy set-up.

This big, livable shelter features a 188cm center height, large windows at front and rear and awnings to allow for ventilation in any weather. A detachable bathtub floor allows customized use of interior space.

<b>Backcountry Barn</b>	2 doors, 2 awnings
Capacity:	4-5
Minimum Weight:	6,65 kg
Floor Area:	7,4 sq. m
Interior Peak Height:	188 cm
Livable Volume:	9797 L
Release Date:	January 2011

## Explore Series

Shelters engineered with the ideal balance of strength, weight and space needed to handle the world's harshest environments.

## Dragontail™

The lightest all-condition MSR tent provides single-wall protection for two people plus gear in a strong, hooped design. New, zippered closure on the overhead ventilation tunnel seals out spindrift and peaked center helps shed rain and snow. Smaller floor plan increases pitching options and new pole clips ease set up. Waterproof DuraShield coating provides superior resistance to moisture-induced breakdown.

<b>Dragontail</b>	1 door, 1 vestibule
Capacity:	2
Minimum Weight:	2,14 kg
Floor + Vestibule Area:	2,7 + 0,93 sq. m
Interior Peak Height:	104 cm
Livable Volume:	2465 + 396 L
Release Date:	January 2011

## Fury™

The lightest, extreme-condition double-wall MSR tent is ideal for pitching with limited available space. New pole clips are easier to set up in winds and allow added ventilation between rain fly and canopy. New waterproof DuraShield™ coating offers superior resistance to moisture-induced breakdown.

<b>Fury</b>	1 door, 1 vestibule
Capacity:	2
Minimum Weight:	2,78 kg
Floor + Vestibule Area:	3,3 + 0,8 sq. m
Interior Peak Height:	114 cm
Livable Volume:	2162 + 510 L
Release Date:	January 2011

## Asgard™

The most livable, freestanding 2-3 person extreme-condition MSR tent with nearly vertical walls – thanks to the innovative BowFrame™ pole geometry – which provides excellent strength and maximizes interior space. StayDry™ entrance and spacious vestibule allow for gear storage, protection or simply enjoying the view – even in nasty weather. FastFeed™ pole sleeves and freestanding design allow for quick and easy setup.

<b>Asgard</b>	2 doors, 2 vestibules
Capacity:	2+
Minimum Weight:	3,36 kg
Floor + Vestibule Area:	3,06 + 1,1 sq. m
Interior Peak Height:	106 cm
Livable Volume:	2463 + 538 L
Release Date:	Released January 2009

## Stormking™

**REDESIGNED** The basecamp fortress for 5-6 people plus gear now features new pole clips that are easier to set up in winds and provide added ventilation between rain fly and canopy. A massive front vestibule, small side vestibule and two doors allow access to gear in any weather. Durable waterproof DuraShield™ coating offers superior resistance to moisture-induced breakdown.

<b>Stormking</b>	2 doors, 2 vestibules
Capacity:	5-6
Minimum Weight:	5,58 kg
Floor + Vestibule Area:	5,9 + 2,4 sq. m
Interior Peak Height:	160 cm
Livable Volume:	9288 + 1132 L
Release Date:	January 2011
