New Products for 2010

Reactor® 2.5 Pot

The new Reactor 2.5L Pot expands on the versatility of the highly-efficient, all-condition Reactor Stove System. Like the 1.7L pot sold with the system, the Reactor 2.5L Pot features an Integrated Heat Exchanger that works exclusively with the Reactor Stove. Better for melting snow and cooking larger meals, this new pot can also fit the stove and an 8 oz. MSR IsoPro™ canister when packed. The lightweight, hard-anodized aluminum pot features a BPA-free strainer lid and a Talon™ Pot handle. Reactor Stove sold separately.

Reactor 2.5L Pot

Boil Time (1L):	Lab: 3:03 10 MPH Wind: 3:28

System Weight:	937.1 g (w/ Reactor Stove and 8 oz IsoPro)
Release Date:	January 2010

MSR Reactor Stove and MSR IsoPro Canister Not Included

Carbon Reflex™ 3P

Providing full-featured room for three at a weight usually packed for two, the Carbon Reflex 3P is the newest tent in the MSR Fast & Light™ series. The free-standing shelter features two doors, two vestibules and ample room for living and storage. Comparable to the MSR Mutha Hubba™ tent in volume, the Carbon Reflex 3P shaves nearly a pound of pack weight at just 2 kg. The efficient design includes easy-setup carbon fiber poles, mesh walls for superior ventilation and versatile assembly options. The shelter can be set up as a double-wall tent or with just the fly and footprint for a compact, flyweight shelter at just 1.5 kg.

Carbon Reflex 3P	3 person, 2 doors
Minimum Weight:	1.5 kg
Floor + Vestibule Area:	3.8 + 1.8 sq. m
Interior Peak Height:	117 cm
Livable Volume:	3530 + 566 L
Release Date:	January 2010

Interior Peak Height: 117 cm
Livable Volume: 2945 + 623 L

Rain Fly Color: Moss Green
Release Date: January 2010

Mo Room™ 2P & 3P

Featuring innovative Bow Frame pole geometry, the Mo Room 2P and 3P tent walls are nearly vertical, offering the ultimate in livable protection. The pole geometry also provides easy access Stay-Dry entrances and two vestibules, one of which is a gear-swallowing hoop style. FastFeed poles sleeves speed up the setup process, especially when doing it alone. Available in the MSR Basecamp™ Series, these high-performance group-camping tents are now available with a new Sage Green rainfly color exclusively in Europe.

Mo Room 2P 2 person, 2 doors
Minimum Weight: 3.08 kg
Floor + Vestibule Area: 2.8 + 1.7 sq. m
Interior Peak Height: 106 cm
Livable Volume: 2265 + 821 L

Mo Room 3P 3 person, 2 doors
Minimum Weight: 4.04 kg
Floor + Vestibule Area: 4.08 + 2 sq. m
Interior Peak Height: 114 cm
Livable Volume: 4360 + 963 L
NEW Rain Fly Color: Sage Green

Release Date: January 2010

ElbowRoom™ 2P &3P

Featuring innovative Bow Frame pole geometry, the ElbowRoom 2P and 3P tent walls are nearly vertical, resulting in the most livable freestanding tent in the MSR BaseCamp™ Series. The pole geometry also provides easy access Stay-Dry entrances and vestibules for storing gear or simply enjoying the view—even in nasty weather. FastFeed poles sleeves speed up the setup process, especially when doing it alone. Now available with a new Sage Green rainfly color exclusively in Europe.

Elbowroom 2P	2 person, 2 doors
Minimum Weight:	2.9 kg
Floor + Vestibule Area:	2.8 + 1.1 sq. m
Interior Peak Height:	106 cm
