## 1 PREPARE FOR SETUP

1. Spread tent out; stake corners tightly.

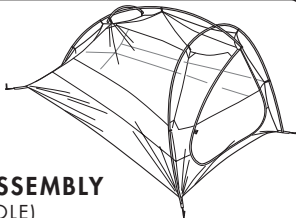

## 2 ASSEMBLE TENT FRAME

1. Insert tips of front arch pole into grommets at front corners of tent.
2. Insert tips of main arch pole into rear grommet and grommet above door.

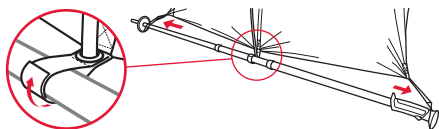

## 3 ATTACH CLIPS

1. Insert short cross pole into the two grommets at midpoint of tent ceiling.
2. Attach all clips to the tent frame.

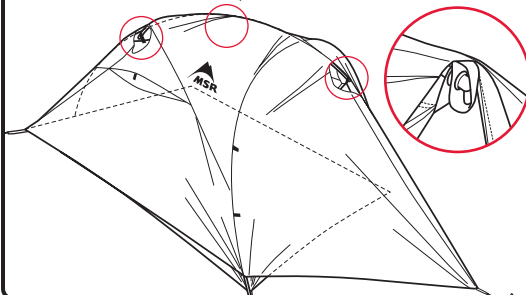

### OPTIONAL FREESTANDING ASSEMBLY (ATTACH TREKKING POLE)

3. Attach trekking pole adaptor to middle of trekking pole. Attach rear stake loops to handle and tip of pole and extend until tent is taut.
4. Insert main arch pole into adaptor grommet.

## 4 ATTACH RAIN FLY

1. Lay rain fly over tent and attach grommets at vents to both ends of short cross pole.
2. Attach grommet at top of vestibule to main arch pole above door.
3. Attach rain fly to tent and tighten webbing at all stake loops.
4. Pull out vestibule until taut; stake down.

**Note:** All tents require staking. Unstaked tents are susceptible to wind damage. In some conditions, additional stakes and cord will be necessary. Re-adjustment of stakes and rain fly may be necessary to keep tent tight and weatherproof. Footprints help to keep your tent clean, dry, and protected from abrasion. Following these tips will prolong the life of your tent.
