

## Notice of Product Defect

August 27, 2012

Cascade Designs, Inc. has issued a notice regarding the caps used on SweetWater® Purifier Solution bottles. Certain caps are prone to cracking, which could allow the solution to seep out.

To determine if a cap is questionable, look at the expiration date printed on the bottle:

ALL WHITE caps on bottles with an expiration date of April 2014 or EARLIER should be replaced.

If you have a bottle of SweetWater® Purifier Solution which meets the above criteria, please refrain from using or carrying the product until you obtain a new cap. You can get a replacement cap from the retailer where you purchased the solution, or by contacting Cascade Designs, Inc.

We apologize for any inconvenience.
