

## Therm-a-Rest 2013 New Products: Sleeping Bags and Blankets

### Antares™

This three-season 750+ fill-power goose down sleeping bag features a cutting-edge combination of technology, design and materials, making it the lightest three-season solution in Therm-a-Rest's sleeping bag collection—and one of the lightest on the market.

- **Patent-pending SynergyLink™ Mattress Connectors**—compatible with up to 25-inch-wide sleeping pads—create the most secure mattress connection in the industry. Two flexible fabric bands create a snug fit around almost any mattress, keeping your bag centered and eliminating problems with sliding, twisting and cold spots.
- **Thermal-mapped zonal insulation** puts loft where it's needed most. Insulation is concentrated in the top of the sleeping bag, where it traps rising warm air. There is a carefully measured amount of loft at the sides, where less fill is required to hold warmth. Loft is eliminated in the back of the bag, where a mattress provides full insulation from the ground. Construction is based on thermal mapping and supported by over forty years of sleep research.
- **Efficient Comfort** design features extra room in the torso to allow shoulders, elbows and hips to move freely. At the head and foot the fit is closer, increasing warmth and decreasing overall weight. The design is ideal for side sleepers or anyone who wants more freedom of movement without adding extra weight to their pack.
- A draft tube and collar are added for maximum heat retention. The sculpted hood and a trapezoidal foot box are shaped to fit the body's natural resting position. The bag comes also comes with snag-free zippers as well as a compartmental storage sack, lightweight stuff sack, and stash pocket.

#### Regular:

Temp Rating: 20°F | -7°C  
 Fill: 750+ goose down  
 Weight: 890 g | 1 lb. 15 oz.  
 Fits Up To: 178 cm | 5 ft. 10 in.  
 Girth: 158/147/102 cm  
 52/58/40 in.  
 Stuff sack: 18 x 31 cm | 7 x 12 in  
 Shell: 30D Nylon Rip stop with DWR  
 Lining: 30D Nylon

Retail USD: \$349.95  
 Release Date: January 2013

#### Long:

Temp Rating: 20°F | -7°C  
 Fill: 750+ goose down  
 Weight: 890 g | 2 lb. 2 oz.  
 Fits Up To: 193 cm | 6 ft. 4 in.  
 Girth: 163/152/102 cm  
 64/60/40 in.  
 Stuff sack: 18 x 31 cm | 7 x 12 in  
 Shell: 30D Nylon Rip stop with DWR  
 Lining: 30D Nylon

Retail USD: \$379.95  
 Release Date: January 2013

## Altair™

A four-season, extremely lightweight, highly compressible 750+ fill-power goose down bag that's warm enough to perform in the mountains all year.

- **Patent-pending SynergyLink™ Mattress Connectors**—compatible with up to 25-inch-wide sleeping pads—create the most secure mattress connection in the industry. Two flexible fabric bands create a snug fit around almost any mattress, keeping your bag centered and eliminating problems with sliding, twisting and cold spots.
- **Thermal-mapped zonal insulation** puts loft where it's needed most. Insulation is concentrated in the top of the sleeping bag, where it traps rising warm air. There is a carefully measured amount of loft at the bottom, where less fill is required to hold warmth and a mattress provides insulation from the ground. Construction is based on thermal mapping and supported by over forty years of sleep research.
- **Efficient Comfort** design features extra room in the torso to allow shoulders, elbows and hips to move freely. At the head and foot the fit is closer, increasing warmth and decreasing overall weight. The design is ideal for side sleepers or anyone who wants more freedom of movement without adding extra weight to their pack.
- A draft tube and collar are added for maximum heat retention. The sculpted hood and a trapezoidal foot box are shaped to fit the body's natural resting position. The bag comes also comes with snag-free zippers as well as a compartmental storage sack, lightweight stuff sack, and stash pocket.

### Regular:

Temp Rating: 0°F | -18°C  
 Fill: 750+ goose down  
 Weight: 1120 g | 2 lb. 7 oz.  
 Fits Up To: 178 cm | 5 ft. 10 in.  
 Girth: 158/147/102 cm  
           52/58/40 in.  
 Stuff sack: 20 x 46 cm | 8 x 8 in  
 Shell: 30D Nylon Rip stop with DWR  
 Lining: 30D Nylon

Retail USD: \$459.95  
 Release Date: January 2013

### Long:

Temp Rating: 0°F | -18°C  
 Fill: 750+ goose down  
 Weight: 1200 g | 2 lb. 10 oz.  
 Fits Up To: 193 cm | 6 ft. 4 in.  
 Girth: 163/152/102 cm  
           64/60/40 in.  
 Stuff sack: 20 x 46 cm | 8 x 8 in  
 Shell: 30D Nylon Rip stop with DWR  
 Lining: 30D Nylon

Retail USD: \$489.95  
 Release Date: January 2013

## Navis™

The superlight, 1 lb. 5 oz., 750+ fill-power goose down Navis is ideal for alpinists and other minimalists who seek minimalist, lightweight sleep system solutions. Designed to work in partnership with an insulated jacket—a light down pullover on warm nights or a hooded belay jacket in alpine conditions

- **Patent-pending SynergyLink™ Mattress Connectors**—compatible with up to 25-inch-wide sleeping pads—create the most secure mattress connection in the industry. Two flexible fabric bands create a snug fit around almost any mattress, keeping your bag centered and eliminating problems with sliding, twisting and cold spots.
- **Thermal-mapped zonal insulation** puts loft where it's needed most. Lightweight, sewn-through construction in the upper half of the bag layers easily over a jacket and provides maximum versatility. Full baffles provide extra warmth from the waist down. Fill is eliminated in the back of the bag, where a mattress provides full insulation from the ground.
- **Efficient Comfort** design features extra room in the torso to allow shoulders, elbows and hips to move freely. At the head and foot the fit is closer, increasing warmth and decreasing overall weight. The design is ideal for side sleepers or anyone who wants more freedom of movement without adding extra weight to their pack.
- The bag comes also comes with a compartmental storage sack, lightweight stuff sack, and stash pocket.

### One Size (regular):

Temp Rating:	25 to 45°F   -4 to 7°C
Fill:	750+ goose down
Weight:	610 g   1 lb. 5 oz.
Fits Up To:	Unlimited
Girth:	158/147/102 cm 52/58/40 in.
Stuff sack:	18 x 31 cm   1 x 12 in
Shell:	30D Nylon Rip stop with DWR
Lining:	30D Nylon
Retail USD:	\$249.95
Release Date:	January 2013

## Alpine™ Blanket

Ideal for weight-conscious thru-hikers and backpackers, the 35°F, 750+ fill-power goose down Alpine blanket offers summer-season warmth at a mere 1 lb. 9 oz.

- **Carry Less**—The streamlined blanket reduces weight by focusing on simple versatility and minimalist performance. Lightweight materials and efficient insulation make it a lighter, more packable alternative to a conventional sleeping bag.
- **More comfort, versatility and freedom of movement**—blanket design allows users the freedom to roll, stretch and move across the entire span of a mattress without feeling confined. They also allow better temperature regulation and ventilation, making it easier to sleep comfortably in a range of climates.
- **Sleep Securely**—Partners with a mattress to create a complete sleep system. The shaped footbox wraps snugly around the foot of a mattress and insulated baffles prevent drafts. The included snap kit keeps the blanket secured to a mattress throughout the night.
- Combined with a NeoAir™ XLite™ mattress, the Alpine™ blanket becomes an ultralight, warm weather sleep system that weighs just 2 lbs. 5 oz. (1065 g).
- The blanket also comes with a compartmental storage sack, lightweight stuff sack, and stash pocket.

### Regular:

Temp Rating: 35°F | 2°C  
Fill: 700+ goose down  
Weight: 715 g | 1 lb. 9 oz.  
Fits Up To: 178 cm | 5 ft. 10 in.  
Girth: 123/123/53 cm  
48/48/21 in.  
Stuff sack: 15x23 cm | 6x9 in  
Shell: 30D Nylon Rip stop with DWR  
Lining: 30D Nylon  
  
Retail USD: \$249.95  
Release Date: January 2013

### Long:

Temp Rating: 35°F | 2°C  
Fill: 700+ goose down  
Weight: 803g | 1 lb. 12 oz.

Girth: 123/132/61 cm  
52/52/24 in.  
Stuff sack: 15x23 cm | 6x9 in  
Shell: 30D Nylon Rip stop with DWR  
Lining: 30D Nylon  
  
Retail USD: \$259.95  
Release Date: January 2013

## Saros™

The three-season Saros is ideal for mountaineers, backcountry hikers, and weekend warriors who seek lightweight, warm, and hydrophobic protection. Rated for 20°F and insulated with Therm-a-Rest's own eraLoft™, a proprietary short-staple synthetic insulation in a shingle construction, the Saros provides all-weather performance in a myriad of conditions.

- **Patent-pending SynergyLink™ Mattress Connectors**—compatible with up to 25-inch-wide sleeping pads—create the most secure mattress connection in the industry. Two flexible fabric bands create a snug fit around almost any mattress, keeping your bag centered and eliminating problems with sliding, twisting and cold spots.
- **Thermal-mapped zonal insulation** puts loft where it's needed most. Insulation is concentrated in the top of the sleeping bag, where it traps rising warm air. There is a carefully measured amount of loft at the sides, where less fill is required to hold warmth. Loft is eliminated in the back of the bag, where a mattress provides full insulation from the ground. Construction is based on thermal mapping and supported by over forty years of sleep research.
- **Efficient Comfort** design features extra room in the torso to allow shoulders, elbows and hips to move freely. At the head and foot the fit is closer, increasing warmth and decreasing overall weight. The design is ideal for side sleepers or anyone who wants more freedom of movement without adding extra weight to their pack.
- A draft tube and collar are added for maximum heat retention. The sculpted hood and a trapezoidal foot box are shaped to fit the body's natural resting position. The bag comes also comes with snag-free zippers as well as a compartmental storage sack, lightweight stuff sack, and stash pocket.

### Regular:

Temp Rating: 20°F | -7°C  
 Fill: eraLoft
